MEMORANDUM FOR CBU's, BOE, PSE, and CSE

SUBJECT: PEO Policy Regarding Domain Classification Procedures Under the STRICOM Omnibus Contract (STOC)

1. To ensure that PEO STRI pursues integration/interoperability across all areas of our expertise in support of the Objective Force, I am establishing a standard policy regarding classification for acquisitions under STOC. Classification procedures for unrestricted and set-aside acquisitions under STOC are as follows:

(a) PM Objective Force (Simulation): Each acquisition led by PM Objective Force (Simulation) shall be classified as being across all areas of our expertise. The nature of Objective Force efforts requires integration/interoperability across all current domains. Therefore, all STOC prime contractors are considered for PM Objective Force (Simulation) acquisitions.

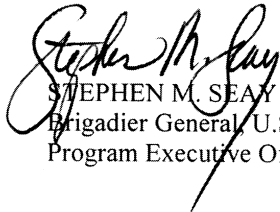

(b) Other CBU: During acquisition planning by a CBU, other than PM Objective Force (Simulation), efforts shall be classified, in coordination with the Contracting Officer, in one or more domains based on the nature of the work.

(1) For acquisitions determined to consist solely within a single domain, only those prime contractors within that domain shall be considered.

(2) For acquisitions determined to involve multiple domains, all prime contractors within the applicable domains shall be considered.

(c) Small Business Set-Asides: For acquisitions competing on a small business set-aside basis, only those small business prime contractors in the applicable domains shall be considered.

2. Thank you for your continued support ensuring a higher level of integration and interoperability for Army and Joint interoperable simulation systems for our nation's warfighters.

STEPHEN M. SEAY
Brigadier General, U.S. Army
Program Executive Officer
